

Is your furnace ready for winter?

Before the snow starts to fly, make sure your furnace is operating efficiently and your pilot light is burning brightly. A properly maintained furnace could save you money this season.

If you are a NorthWestern Energy natural gas or propane customer, you can have your pilot light re-lit by our professional gas technicians at no cost to you. Call our Customer Contact Center at (888) 467-2669 between 7 a.m. – 6 p.m., Monday through Friday to schedule a re-light. You can also visit our website at NorthWesternEnergy.com and use our online form to submit your request electronically.
