Schedule No. T-ITG-1

TRANSPORTATION BUSINESS UNIT
INTERRUPTIBLE TRANSPORTATION NATURAL GAS SERVICE

APPLICATION OF RATES:

Monthly Bill Components: Each month, Shipper's bill shall include a Monthly Service Charge and an Interruptible Commodity Charge for the actual quantities of natural gas delivered for Shipper. Additionally, Shipper shall pay Balancing Penalty and Unauthorized System Use Charges, if applicable.

1. Monthly Service Charge: The Monthly Service Charge shall be the product of the number of delivery meters at Shipper's facility times the applicable Meter Charge(s) set forth above. If Shipper receives service under more than one rate schedule through a single meter, only one service charge per meter per month shall apply.
2. Commodity Charge: The Monthly Commodity Charge shall be the produce of the actual monthly quantities of gas delivered to Shipper at Shipper's Point(s) of Delivery times the Maximum Transmission Commodity Rate set forth above, unless otherwise negotiated between the Utility and Shipper.
3. Balancing Charge: Any imbalance calculated pursuant to Rate Schedule GTC-1 and the Agreement which requires a balancing penalty charge, will be billed at the applicable rate(s) set forth above.
4. Market Price: Market Price is defined as the daily NOVA (AECO-C, NIT) price quoted in Gas Daily Price Survey. The price will be converted to U.S. dollars per Dekatherm using Gas Daily's Canadian/U.S. exchange rate.
5. Cashout Volumes: Cashout Volumes, as defined in Rate Schedule GTC-1, shall be subject to the conditions as set forth in that Rate Schedule.
6. Unauthorized System Use: Shipper shall be subject to an Unauthorized System Use Charge in accordance with Rate Schedule GTC-1, Section 18.4, and shall be billed at the applicable rate(s) set forth above.
7. Discounting Rates: The Utility shall have the ability to discount the Maximum Transmission Commodity Rate set forth above if:
 - A. The Shipper can demonstrate that, as a direct result of the availability of the discounted rate:
 - (1) Uneconomic bypass will be avoided because Shipper has a more economic alternative; or
 - (2) Expanded usage of the system will result through an increase in existing load, or the addition of new load; and
 - B. There is unutilized capacity on the particular facilities necessary to provide the service to Shipper.
