

TABLE OF CONTENTS

Volume 1

Subject	Page
Executive Summary	1
Chapter 1 Background	
• Context of NorthWestern’s Procurement Plan	3
○ NorthWestern and Regional Utilities.....	4
○ Vertically Integrated Utility Value	6
○ Planning for Growth and Evaluating Resource Needs	7
• Comparisons to Activities and 2007 Action Plan	9
○ 2007 RPP Action Plan Items.....	9
○ Colstrip Unit 4.....	11
○ Mill Creek Generating Station	12
○ Energy RFP – October 2008	12
○ Energy RFP – May 2009.....	13
○ Renewable RFP – August 2008	13
○ Renewable RFI – August 2009	14
○ Real-time (Hourly) Scheduling.....	14
• Development of 2009 Electric Supply Resource Procurement Plan	15
○ MPSC Comments on the 2007 Plan	18
○ Wind Integration Working Group.....	20
○ ETAC Overview	24
○ Delay in Filing 2009 Resource Procurement Plan	25
○ Chapter 1 in Summary	26
Chapter 2 Energy Efficiency	
• MPSC Comments on 2007 Plan Energy Efficiency	27
• Updated Study of DSM Potential	27
○ End Use and Load Profile Study.....	29
○ Assessment of Energy Efficiency Potentials (2010-2029)	33
○ Technical, Economic and Achievable DSM Potential.....	33
○ Energy Efficiency Potential under Alternative Scenarios	38
• DSM Acquisition Plan	39
○ Annual DSM Goals.....	42
○ Alternative DSM Acquisition Plans-Three Cases.....	43
○ NorthWestern’s DSM Acquisition Plan-High Case 6.0 aMW/year	44
• DSM Programs.....	46
• Demand Response and Smart Grid	49
○ The Pacific Northwest Smart Grid Demonstration Project.....	50
○ NorthWestern’s Smart Grid Project.....	51
○ NorthWestern’s Project Objectives.....	52
○ Project Scope and Schedule	53

- Lost Transmission & Distribution Revenue54

Chapter 3 Status of Portfolio

- Existing Resources.....55
 - Colstrip Unit 4.....55
 - Tier II QF Contracts.....55
 - QF-1 Tariff Contracts56
 - Judith Gap Energy, LLC56
 - Tiber Montana, LLC57
 - Turnbull Hydro, LLC.....57
 - PPL Montana, LLC.....58
 - Mill Creek Generating Station58
 - Basin Creek Equity Partners, LLC.....59
 - Term Energy Transactions60
- Load and Resources61
- Peak Demand Forecast.....63
- Energy Supply during HL and LL hours65
 - Wind Resources70
 - Capacity72
- Compliance with Montana’s Renewable Resource Standard and Community Renewable Energy Projects73
- Discussion of Next 5 Years.....77
- Additional Components of the NorthWestern Portfolio79
 - Operating Reserves79
 - Regulation and Frequency Response81
- Regulation for Wind81

Chapter 4 Environmental Issues

- Green House Gas Legislation82
- Carbon Sequestration84
- Proposed Clean Air Act Amendments.....85
- NorthWestern’s GHG Policy and Plan Assumptions86
 - CO₂ Emissions Allowances88
 - Other Environmental Emissions90

Chapter 5 Description of Resources

- Resource Descriptions93
 - Generating Technologies95
 - Resource Costs.....95
 - New Thermal Resource: Internal Combustion Engines.....96
 - New Thermal Resource: SCCT Frame Engine.....97
 - New Thermal Resource: LM6000 Engine97
 - New Thermal Resource: Aero-Derivative97
 - New Thermal Resource: Combined Cycle Turbine (CCCT).....97
 - New Thermal Resource: CCCT with Carbon Capture and Sequestration.....98
 - New Thermal Resource: Combined Heat and Power (CHP).....98

- New Thermal Resource: Coal Supercritical99
- New Thermal Resource: Integrated Gasification Combined Cycle (IGCC) .100
- New Thermal Resource: Coal Supercritical or IGCC with CCS100
- Summary of Plant Parameters.....101
- New Renewable Resource: Wind102
- New Renewable Resource: Woody Biomass.....103
- Resource Capacity Value105
- Qualifying Facility Queue.....107
- Fuel Considerations110
- On-System Resources110

Chapter 6 Forecasts and Resource Inputs

- Load Forecast.....112
- Load Resource Balance.....114
- Market Price Forecasts.....118
 - Price Forecasts118
- Comparison to 6th Power Plan119
- High and Low Case Price Forecasts119
- Carbon Adjustment120
- Peak Period Definitions123
- Price Volatility125
- Parameters of Resources Modeled.....128
- Delayed Implementation of CCS129

Chapter 7 Portfolio Modeling

- Update on Portfolio Modeling131
- Intrinsic Portfolios134
- Intrinsic Model Results137
- Intrinsic Analysis Conclusions142

Chapter 8 Risk and Uncertainty Analysis

- Stochastic Analysis148
- Efficiency Frontier149
- Stochastic Results150

Chapter 9 2009 Plan Conclusions

- Energy Supply Direction.....157
- Preferred Portfolios.....158
- Plan Conclusions.....161

Chapter 10 Action Plan

- 2009 Action Plan Discussion166

Appendices

- Appendix 1. Energy Supply Hedging Strategy.....169
- Appendix 2. Avoided Cost Information.....175
- Appendix 3. Price Elasticity of Demand.....179
- Appendix 4. Abbreviations181

LISTING OF FIGURES AND TABLES

Volume 1

Figure	Page
1 NorthWestern’s Electric Supply Sources.....	11
2 Resource Procurement Plan Work Flow.....	16
3 Overall Residential and Commercial Electricity Consumption by End Use	32
4 Overall Electric Load Shape by Sector.....	32
5 Example of Alternative Forecast Approach to Estimation of Energy Efficiency Potential	36
6 Projected 2029 Sector Sales and DSM Potential by Sector.....	37
7 Supply Curves for Achievable Potential in Alternative Avoided Cost Scenarios.....	39
8 Base Case Retail Load Forecast 2010-2029	61
9 Peak Demand	65
10 January 2009 Load Variability.....	67
11 July 2009 Load Variability	68
12 Load Versus Wind Energy Output 11-1-2009	72
13 Load Versus Wind Energy Output 11-5-2009	72
14 Load Versus Wind Energy Output 11-14-2009	72
15 Load Versus Wind Energy Output 11-26-2009	72
16 Five Year Load-Resource Balance	78
17 2010 Retail Load: Energy Usage by Rate Class.....	113
18 NorthWestern Energy 2010-2019 Monthly HL Electric Supply Forecast.....	116
19 NorthWestern Energy 2010-2019 Monthly LL Electric Supply Forecast	117
20 Price Forecast Compared to NWPCC 6 th Power Plan	119
21 Low, Medium and High Price Forecasts for Flat Power	120
22 Carbon Emission Cost Comparison	121
23 Price Range for Peak Period HLH1	126
24 Volatility for Peak Period HLH1	127
25 Intrinsic Model Variables	135

26	Colstrip 4 Dispatched Scenarios	144
27	Load Sensitivity Cases	146
28	Efficiency Frontier	149
29	Base Case Efficiency Frontier	151
30	High Market Case Efficiency Frontier	152
31	Delay Carbon Case Efficiency Frontier	153
32	No Carbon Case Efficiency Frontier	154
33	Low Market Case Efficiency Frontier	155
34	Efficiency Frontier for all Scenarios	161

Table	Page
1 20-Year Supply Position	8
2 5-Year Supply Position	8
3 Wind Integration Working Group Primary Modeling Scenarios.....	23
4 Overall Electricity Breakdown	30
5 Residential and Commercial Sub-Sectors.....	31
6 Residential and Commercial End Uses.....	31
7 Projected Sales and Cost per kWh Saved in 2029 Under Potential Scenarios	37
8 Achievable Potential Under Alternate Scenarios (aMW).....	38
9 Summary of DSM Acquisition Plan Cases Used in Portfolio Analysis	44
10 NorthWestern DSM Acquisition Plan and Budget 2010-2029.....	45
11 20-Year Load Resource Balance	62
12 Historical Peak Demand	64
13 Forecast Peak Demand.....	64
14 Light Load Contracted Supply	69
15 Montana Renewable Resource Standard	73
16 Judith Gap Wind Energy Production	75
17 Estimated Additional Renewable Energy Credits (RECs)	
Required to Meet Montana RPS	75
18 PPL Montana: 7-Year Term Contract Schedule of	
Remaining Contract Volumes.....	78
19 Carbon Scenarios	87
20 Carbon Emission Allowances	90
21 Coal Unit Emissions	91
22 Resource Cost Summary.....	96
23 Carbon Emissions	101
24 Carbon Pricing	102
25 NorthWestern A.R.M. §38.5.1908 Compliance	108
26 NorthWestern Active QF-1 Requests	109
27 20-Year Retail Load and DSM Program Energy Savings	114
28 Base Case Power Price Forecast Montana Delivery.....	122

29	No Carbon Penalty Case Power Price Forecast Montana Delivery	122
30	Quarter 1 (Peak Period Definition)	123
31	Quarter 2 (Peak Period Definition)	124
32	Quarter 3 (Peak Period Definition)	124
33	Quarter 4 (Peak Period Definition)	124
34	GenTrader® Implied Volatility	128
35	Intrinsic Portfolio Case	136
36	Scenario Weighting	138
37	20-Year Levelized Portfolio Costs	139
38	Weighted Average 20-Year Levelized Costs – Intrinsic Results	141
39	Colstrip 4 Average Annual Capacity Factor (Economic Dispatch Mode)	145
40	Load Sensitivity Cases	146
41	Load Sensitivity – Base Case Intrinsic Results	147
42	RiskVar90 for Stochastic Results	156
43	Top Three Portfolios by Efficiency Frontier Position	160
