Flooded Suction Proposal

Prepared For: Grady Livestock
Pivot Upgrade
Covering: 11.3AC

Prepared By: Connor Watson

4' Gravity
Screen Box

An aerial photograph of a large, rectangular agricultural field. The field is divided into numerous long, narrow, parallel strips, likely for irrigation purposes. A network of yellow lines, representing a pipe system, crisscrosses the field. A large black circle is drawn over the central part of the field. A blue line runs along the right edge of the field. The surrounding area is mostly green, with some brown patches. A small white building is visible at the bottom center of the field.

A technical diagram of an irrigation system layout. It features a blue boundary line representing the system's perimeter. Inside, a yellow line represents a mainline pipe, with several black dots indicating valve or turnout locations. Two large circular areas represent the coverage of different pipe sections. One circle is labeled '494' Reinke 8.9/11.3AC 150GPM' and the other is labeled '720' Pipe'. In the top left corner, an arrow points to a specific location labeled '4' Gravity Screen Box'.
