

## Energy Efficiency is the Cornerstone of *Green* for Your Business

Savings Made Simple. If you're a commercial electric customer of NorthWestern Energy in Montana, you're probably leaving money on the table. Surprised? You're in good company. Many businesses don't take advantage of rebates and incentives we offer for implementing energy efficiency measures. The fact is, our Efficiency Plus (E+) Program offers you dozens of ways to save on energy through reduced use, rebates and incentives. Before you plan existing upgrades or new construction, check out your options.

Lighting often presents opportunities for saving energy – and rebates are available. However, rebates and incentives are also offered for highly specialized electric measures, such as refrigerator and freezer case lighting.

Visit [NorthWesternEnergy.com/Eplus](http://NorthWesternEnergy.com/Eplus)  
Call **NorthWestern Energy Efficiency Program Hotline at (800)823-5995**  
For complete details and current application forms

Most NorthWestern Energy commercial, industrial, and agricultural electric customers in Montana qualify for E+ programs. "Choice" customers, those who buy their electricity through a contract with a competitive supplier, are not eligible. Natural gas customers who buy their natural gas supplies from NorthWestern Energy may qualify for custom incentives through the E+ Business Partners program. *If you are unsure, please do contact us.*

### **Electric Customers: Existing Facilities/New Construction - Rebates**

**E+ Commercial Lighting Rebate:** Replace indoor and exterior lighting products with high efficiency technologies. LED Tubes, LED lamp and fixtures, and switch-mounted occupancy sensors installations may apply. Exterior lights included in an "Unmetered Services" line item on a NorthWestern Energy billing statement are not eligible for rebates. *If you are unsure about an exterior light, please do contact us.* We also provide a listing of Montana Lighting Trade Allies to assist you with lighting projects.

**E+ Commercial Air Conditioning:** Chiller equipment, HVAC demand control ventilation, ECM motors, and anti-sweat heater controls.

**E+ Commercial Refrigeration:** Measures for refrigeration in grocery, convenience store, and refrigerated storage.

**E+ Commercial Electronics and Appliances:** ENERGY STAR® electric steam cooker and timer for engine block heater.

**E+ Commercial Water Heating:** Low-flow aerator, showerhead, and hot water tank insulation.

**E+ Commercial Variable Frequency Drives (VFDs):** Variable speed drives for motor pump or fan systems; VFDs for air compressors and refrigeration compressors.

**E+ Motor Rewind Rebates:** Rewinds for motors 15 horsepower (HP) and greater. Motor rewinds to Green Motor Practices by certified motor service provider.

## Custom Incentives

**E+ Business Partners Program:** Customized to commercial and industrial customers for electric or natural gas energy efficiency in *new or existing facilities*. “Choice” customers, those who buy their electricity or natural gas through a contract with a competitive supplier, are not eligible. *If you are unsure, please do contact us.* Examples of projects include measures to improve lighting, heating and cooling (HVAC) systems, refrigeration, air handling and pumping systems.

### For Irrigators

**E+ Irrigator Program:** Incentives and rebates for Installation of energy efficient electric efficiency in irrigation systems.

## Another Approach to Get Started

**Free Energy Appraisal** for most electric customers that focuses on identifying electric efficiency opportunities for small commercial customers on NorthWestern Energy’s electric distribution system. A report with recommendations customized to the facility is provided. Some energy saving measures may be installed as appropriate.

## More Opportunities

**E+ Green Power** Electric customers have the option to “Green up” their monthly service for as little as \$2 extra a month. By doing so, they help fund renewable energy and help provide environmental benefits associated with renewable energy that is being generated in the northwest and Wyoming. Visit [NorthWesternEnergy.com/GreenPower](http://NorthWesternEnergy.com/GreenPower) for details and to sign-up online.

**Renewable Energy:** Visit our website for resources with renewable energy for your business. Incentives are available to qualifying projects for non-profit facilities or public buildings.

## Training Opportunities

Visit our website for resources and opportunities for free or reduced cost training for your business at [NorthWesternEnergy.com/training](http://NorthWesternEnergy.com/training).
